How to use the "Goddard" Beamer theme?   Back   Forward

Introduction

beamer-goddard is a LaTeX Beamer theme inspired by the Goddard Fedora 13 theme[1] and the Anaconda GUI layout[2].

Comments, suggestions or bug reports ?

Some tricks. . .

Download

The theme is available as a `.tar.bz2` or a `.zip` archive file at

- `http: //melmorability.fedorapeople.org/beamer/ beamer-goddard/beamer-goddard-0.1.tar.bz2`

- `http: //melmorability.fedorapeople.org/beamer/ beamer-goddard/beamer-goddard-0.1.zip`

Installation

Once the archive downloaded and extracted, copy texmf stuff:

Windows in C:\texmf\ with MikTEX or TEXLive

Unix with TEXLive:
- in ~/texmf, for a single user
- in /usr/share/local/texmf/, for all users

Installation

Don't forget to update your ls-R database!

MikTEX launch the MikTEX options toolbox

TEXLive **Windows** launch `texhash` in a DOS shell

Unix launch `texhash` (as root in the theme was installed for all users)

How to use it?

Just call the theme using \usetheme{Goddard} in your preamble

A sample LaTeX preamble

\documentclass{beamer}

\usepackage[american]{babel}
\usepackage[T1]{fontenc}
\usepackage[utf8]{inputenc}
\usepackage{lmodern}

\usetheme{Goddard}

How to use it?
Options

language=⟨*language*⟩ to change the labels language in the buttons of the progress bar.
Available languages are english, french, german, italian, portuguese, spanish.

oldstylearrows to use old-style arrows in buttons:

⟨••••⟩ default ⟵ ⟶ old-style

Example

% Labels in French, old−style arrows
\usetheme[language=french,oldstylearrows]*%*
  {Goddard}

How to use it?
Some tricks. . .

Alternating table row colors

Release	Name	Release	Name
Fedora 14	Laughlin	Fedora Core 7	Moonshine
Fedora 13	Goddard	Fedora Core 6	Zod
Fedora 12	Constantine	Fedora Core 5	Bordeaux
Fedora 11	Leonidas	Fedora Core 4	Stentz
Fedora 10	Cambridge	Fedora Core 3	Heidelberg
Fedora 9	Sulphur	Fedora Core 2	Tettnang
Fedora 8	Werewolf	Fedora Core 1	Yarrow

How to use it?
Some tricks. . .

Alternating table row colors

1. Add the [xcolor=table] option to \documentclass{beamer}
2. Add the following line to your preamble:

   rowcolors{1}{goddardblue!50}**%**
     {goddardblue!30}

Syntaxic coloration in `lstlisting` environments

```c
#include <stdlib.h>
#include <stdio.h>

/* A comment */
int main (int argc, char* argv [])
{
  printf ("Hello world!");

  return EXIT_SUCCESS;
}
```

How to use it?
Some tricks. . .

Syntaxic coloration in `lstlisting` environments

Add the following lines to your preamble:

```
\lstset{%
  basicstyle=\ttfamily,%
  keywordstyle=\color{goddardblue}%
  \bfseries,%
  commentstyle=\color{goddardblue!75}%
  \itshape,%
  columns=flexible%
}
```
